

Subject: Invalid dates in the Marvel API

Dear Marvel Developer Portal,

I am writing this report to inform about a possible data inconsistency found in the `/v1/public/comics/{comicId}` operation of the Marvel API. When searching for specific comics, the API seems to return invalid dates.

For instance, when providing the input ID "6318", the API returns "-0001-11-30T00:00:00-0500" as a date field ("focDate").

I would be grateful if you could confirm whether this behavior is an inconsistency. The following video shows how to replicate this process.
